

# Vendor Prequalification System

**Byrne Software Technologies, Inc.** is a privately held IT (Information Technology) consulting and software development company located in St. Louis, Missouri. In business since 1985, we specialize in providing business application and process solutions to clients in the areas of architecture, engineering, construction, utilities, manufacturing, government, retail and health care.

## Vendor Prequalification System

The Vendor Prequalification System is a custom Web-based application that automates the vendor application process for organizations. The system streamlines workflow so you can focus on selecting qualified vendors to meet procurement deadlines and standardize processes to better achieve business goals. Prequalification of vendors is of critical importance as it insures that only well qualified vendors are awarded work. As a result, this can be a tedious and time consuming manual effort to keep vendor information up-to-date for both parties.

## System Benefits

The Vendor Prequalification System's primary end-benefit is to reduce the amount of manual effort for procurement departments with an automatic workflow process. The tool incorporates a Web-based platform, using .Net technology, for new vendor submissions and annual renewals. The central repository for vendor information, simple online forms/administrative analysis worksheets, and company-wide database for querying, demonstrates the business value in using the Vendor Prequalification System for a critical part of your operations.

## Value Propositions

- Improved vendor application turn-around time
- Reduction in errors and manual re-entry of data
- Ensures only pre-qualified vendors are permitted to submit bids on proposals for projects
- Centralized location for vendor data
- Efficient sign-off review and approval process
- Remote access to information
- Leverages integration with other systems
- Adoption of standardized project management practices
- Eliminate paper processes, mailing, and administrative costs

**Byrne Software** has been serving Prolog customers in the state of Missouri, Illinois, Kansas and Iowa since 1999. We are the Meridian Systems Midwest Authorized Reseller and Prolog Systems Integrator partner.
